

# 26 Pct Auxiliary Sergeant Martinez needs our help!

A/Sgt. Rafaelito Martinez of the 26th Pct. is an 11 year veteran. He has been recently diagnosed with Stage 4 liver disease (cirrhosis due to fatty acids) and placed on the transplant list just today. He is frantically seeking a donor. His blood type is AB.

Potential donors can go to [nyp.org/livingdonorliver](http://nyp.org/livingdonorliver) to complete a questionnaire to determine compatibility. Surgery, meds and aftercare covered 100% by his insurance. If you donate a piece of your liver, it grows back! A healthy liver will regenerate itself.
